Page Director

Create, alter or delete an unlimited number of page zones, on demand. Paging is possible at a single loudspeaker or over any given range of loudspeakers, offering virtually unlimited control over any number of floors or buildings.

Simply select the desired loudspeakers, name the zone and enter a description for future reference—for example, 'Floor 1, Meeting Room.' Select one of three Audio Input Modules to use for each page, such as a microphone. If only one device is available, the software selects it by default. Manually end the page or set it to finish automatically, after which the system returns to its default settings. Sort paging zones into user-defined categories and subcategories for easy accessibility. For more details, see the help file or user guide.

Launch the software with this desktop icon.

SPECIFICATIONS

PD

Operating Systems	Windows 10
	Windows 8/8 .1
	Windows 7 SP1 or later
	Windows Vista SP2 or later
Architectures	X86
	X64
Hardware Requirements	Computer with 1 GHz or faster processor with 1 GB RAM or more
	Graphics parts supporting WDDM drivers (Windows Display Driver Model) recommended
	Minimum disk space (Microsoft components/Installation): X86 - 4.5 GB; X64 - 4.5 GB
	Disk space (LogiSon components): 5 MB
Prerequisites	Microsoft .NET Framework 4.5.2 or later (incl. with Windows 10 or later)
